AI Community Aid Navigator

Post-Plan User Choices & Email Flow | Product / UI Handoff

Purpose

After the Navigator generates a Crisis Action Plan, the user must be offered clear choices for what happens next. The user must be able to keep using the plan without being forced to create an account or provide an email address.

1. Screen shown after the Crisis Action Plan is generated

Display the following screen immediately after the plan is ready. Present all three choices clearly.

Your Crisis Action Plan is ready!

Your personalized plan is ready. How would you like to keep it?

1. CREATE AN ACCOUNT

Save your plan, return to it later, and track your progress as you complete each step.

2. EMAIL ME A COPY

Receive a one-time copy of your plan by email. You do not need to create an account.

3. FINISH WITHOUT SAVING

End this session without saving your plan. Temporary session data will be discarded.

Important: Email delivery must not create an account. Only account registration enables persistent access and progress tracking. If the user finishes without saving, temporary session data is discarded.

2. Email delivery flow

If the user selects “Email me a copy,” ask for an email address and show the privacy notice before sending. This is a one-time delivery only.

PRIVACY NOTICE BEFORE EMAIL DELIVERY

Your Crisis Action Plan may contain sensitive personal information, including details about your household, income, employment, family circumstances, and assistance needs. Email may not be a fully secure way to transmit sensitive information. Make sure the email address belongs to you and that only you can access it. Email delivery is optional. Requesting a copy does not create an account or subscribe you to communications.

Suggested buttons: “Send my plan” and “Go back”. Do not preselect the email option or send automatically.

3. Email sent to the user

Subject: Your Community Aid Navigator — Your Personalized Action Plan

Hello,

Thank you for using the AI Community Aid Navigator.

As requested, a copy of your personalized Crisis Action Plan is attached to this email. The plan includes potential assistance programs, recommended next steps, and information about how to access available resources.

Please review the recommendations and contact the relevant organizations directly to confirm eligibility, current availability, and application requirements.

The Navigator provides guidance and information. It does not guarantee eligibility or approval for any assistance program.

For your privacy, please keep this email and the attached plan in a secure place. If you use a shared email account or device, other people may be able to access this information.

We hope this plan helps you navigate the next steps and find the support you need.

The AI Community Aid Navigator Team

4. On-screen confirmation after successful email delivery

Your plan has been sent.
A one-time copy of your Crisis Action Plan has been sent to the email address you provided. No account has been created. You can create an account separately if you want to save your plan and return to track your progress.

5. Product and implementation requirements

Requirement	Expected behavior
No forced registration	The user can receive and use the generated plan without creating an account.
One-time email delivery	Emailing the plan is a standalone option and does not create an account.
Persistent plan access	Requires optional account registration; the user can later return to the same Case and track progress.
No-save exit	If the user finishes without saving, temporary session data is discarded and the plan is not available later.
Privacy choice	Show the privacy notice before email delivery and let the user decide whether to proceed.

This handoff describes intended user-facing behavior. It does not prescribe a specific technical implementation or email provider.
